

**Result**®

**GENUINE RECYCLED**

*For people and planet*

# IT IS GENUINELY RECYCLED.

Understated and stylish, our RECYCLED collection combines simplicity of design with clean lines and contemporary recycled fabrics that are beautifully textured and wonderfully unique.

Recycled SAFE-GUARD welcomes early nightfall in styles to lift your safety and brighten dark nights, adding layers, texture and warmth to roadside visibility.

By working with speciality fabrics made from recycled plastic, this new exciting **Genuine Recycled** collection shows the **Result**<sup>®</sup> commitment to produce sustainable, ethical garments whose yarn production gives off fewer emissions and consumes less energy and water than conventional yarns.

Every garment in the range is made from as close to 100% recycled materials as possible and every hat in the range is made from 50% recycled materials.

**Result**<sup>®</sup> works with certified partners **perPETual**<sup>®</sup>, **TOPGREEN**<sup>®</sup>, **REPREVE**<sup>®</sup> and **JIAREN**<sup>®</sup> to create fibres made from recycled plastic, and allows **Result**<sup>®</sup> to calculate, based on a single size L garment, the number of equivalent 1 litre bottles that would have been sent to landfill.

The yarn spun from these fibres is sent to a certified mill to weave or knit fabric for the **Result**<sup>®</sup> **Genuine Recycled** range. As with all **Result**<sup>®</sup> ranges, all aspects of manufacture and practice have been checked to meet their high standards for a respectful, secure work environment with reasonable hours, good wage and work conditions.

**Result**<sup>®</sup> ensures the supply chain is traceable to prove the origin of garments.

So watch us grow - **Result**<sup>®</sup> **Genuine Recycled** has already stopped the equivalent of 4 million 1 litre bottles from landfill. We hope to double this figure every year. Our goal is to increase use of recycled materials in products and reduce/eliminate the harm caused in their production.

# REDUCING LANDFILL AND POLLUTION IN OUR OCEANS

Connect with **Result**<sup>®</sup> **Genuine Recycled** and improve your Corporate Social Responsibility  
 • Reduce plastic in landfill • Protect against soil contamination • Protect against air & water pollution

**As a world brand, we have always taken the burden of waste seriously.**

Environmental considerations are an integral part of our business practice. We insist and encourage all supply partners to pursue correct environmental practices, especially the recycling of waste materials and the re-circulation of waste heat generated during dyeing.

 <p>Numbered bottles represent the equivalent number of 1 litre PET bottles used in the process of making the garment based on size L.</p>	 <p>When you no longer need your garment, check its label, contact your local end-of-life textile options to upcycle, and give your garment a second life by preventing landfill. Where indicated, fabrics and trims are suitable for extraction and repurposing.</p>	 <p>This garment is PFC-Free or PFOA-Free.</p> 
 <p>perPETual® has developed a unique scalable technology to convert plastic bottles into high quality filament yarn.</p>	 <p>Environmentally friendly materials made from recycled PET-bottles offering a sustainable equivalent to conventional yarns.</p>	 <p>REPREVE® performance recycled fabric uses environmental-friendly materials made from recycled plastic bottles and post-industrial waste.</p>
 <p>An international, voluntary, full product standard that certifies recycled content, social and environmental practices and chemical restrictions.</p>	 <p>Oeko-Tex certified fabrics are completely free from harmful chemicals and safe for human use. To attain Oeko-Tex Standard 100 certification, the fabric has been tested and certified to be free from harmful levels of more than 100 substances known to be harmful to human health.</p>	 <p>Eco-Friendly zippers recycled from PET bottles and other post-consumer materials using the latest technology.</p> 
 <p>Uses unique chemical recycling system where waste clothing and polyester materials are chemically decomposed and reduced.</p>	 <p>To minimise flexible packaging in the environment, cardboard packaging, labels and hangtags are made, where possible, from recycled materials.</p> <p>Opaque biodegradable plastic bags ensure garments are kept pristine on their journey but leave no environmental trace.</p>	 <p>Garments are shipped on recycled wooden pallets wrapped in BioZ oxo-biodegradable plastic: an opaque wrap whose treatment triggers degradation after 6 to 12 months and breaks down fully, reverting to just carbon and oxygen. No trace is left to pollute the environment; it does not form micro-beads and can be collected and/or recycled with other plastics without causing any contamination.</p>

**DECORATION PROCESS**

**Result**® garments are designed to take decoration with hidden access points to allow for frame or platen purchase on outer fabric. Recommended decoration types have been tested independently and can be taken as an indication as to how the garment may perform. Accuracy or completeness is not guaranteed so before use, the decorator must still determine the suitability of the product for the decoration intended. Printers in particular employ different techniques and use a variety of products so **Result**® does not take responsibility for third party decoration and always recommends testing before bulk decoration.

When garments can be printed onto any colour other than white, extreme caution must be observed.

Due to the engineering of manmade materials, there is a high risk of colour migration through the ink film. This may however be managed by experienced printers with the correct inks. When suggesting digital transfers, customers are encouraged to seek advice from their digital media supplier, whether be it for full colour imagery or simple vinyl CAD cut transfers.

Contact enquiries@resultclothing.com for further guidance.

## OUR ECOLOGICAL STORY CONTINUES....

Set within a wildlife woodland haven with protected freshwater lagoon, our distribution centre boasts the latest warehousing systems technology and employee programming skills, resulting in better working conditions, increased productivity and increased sustainability.

- Timing sensors for lighting, heating and cooling to reduce energy consumption
- Digital equipment and mobile data capture to reduce paper use
- Full carton ship only, using efficient pallet packaging
- Woodland planting to counteract carbon emissions
- Energy saving air recirculation system
- Electrically powered forklift fleet
- Solar powered renewable energy
- Air freight-free

**Result**® committed to a greener environment.
